

Assignment 1:

Develop a simple game of **Guess My Number**.

Requirements:

- User inputs a number between 1 and 10.
- The application generates a random number between 1 and 10.
- User wins if the input number matches the random number.
- The application keeps track of and displays the total wins and losses.
- User can end the game any time.

Other Requirements:

- Include the viewport setting in the html file
- Assignment folder setup:
 - Create a folder for this assignment.
 - The index.html should be the only file in the assignment folder.
 - All other files should be in sub-folders, for example:
 - **CSS** sub-folder to include all CSS files
 - **images** sub-folder to include all images
 - **pages** sub-folder to include all HTML files other than the index.html
 - **js** sub-folder to include all JavaScript files
 - ...

Submission:

- **Submit a zipped copy of the assignment folder** to the **Assignment #1** Dropbox on SLATE (**e-mail submissions will NOT be accepted**).
- **Publish your assignment** to your cPanel account and include the site URL in the comments area of the Dropbox. **Include the password** for the user "prof" for me to access the site ONLY IF PASSWORD PROTECTED (**20% will be deducted if application is not deployed to cPanel**).
- Assignment can be submitted for up to 3 days after the due date with 10% penalty per day. After 3 days the assignment will no longer be accepted.
- Only the last submission is marked.
- This assignment must be completed **individually**. Any attempt at cheating on the assignment will result in a grade of zero. Please refer to the [Academic Dishonesty Policy](#).
